Telo – an overview

TELO is an **environmental control unit**: a device that enables users to remotely control one or more electrical appliances in their home's rooms.

TELO is designed for people with motor disabilities who cannot perform certain tasks in their living environment and who wish to gain autonomy by achieving them on their own.

TELO is accessible in four different ways:

- By the touch screen.
- By a wired switch directly connected to TELO.
- By a wireless switch.
- By a joystick.

It may be used **with scanning** functionality with different scanning modes.

To avoid data loss in case of malfunction TELO, it is possible to **backup** your data to an external memory.

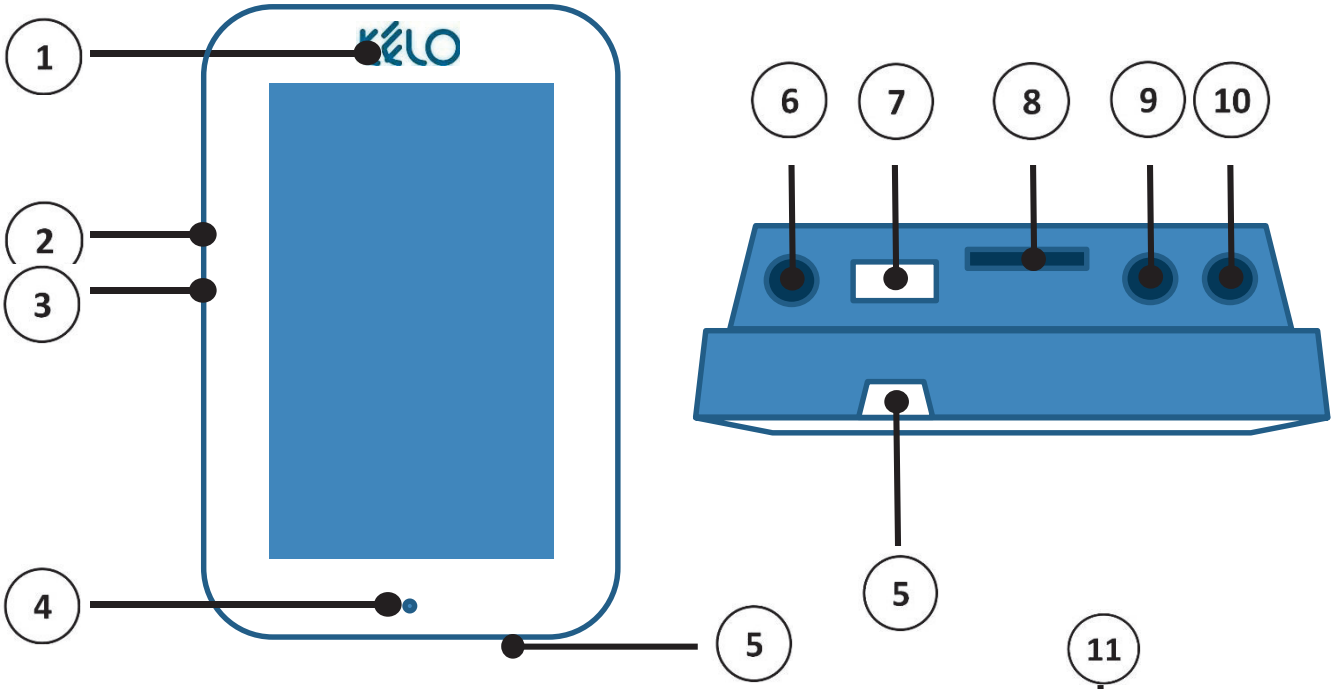
TELO is able to **save Infrared codes** of device's remote controls of the user, to store them in pages' keys and so to replace the remote controls.
It is also possible to **make a macro of infrared codes**, which means a succession of codes on the same key.

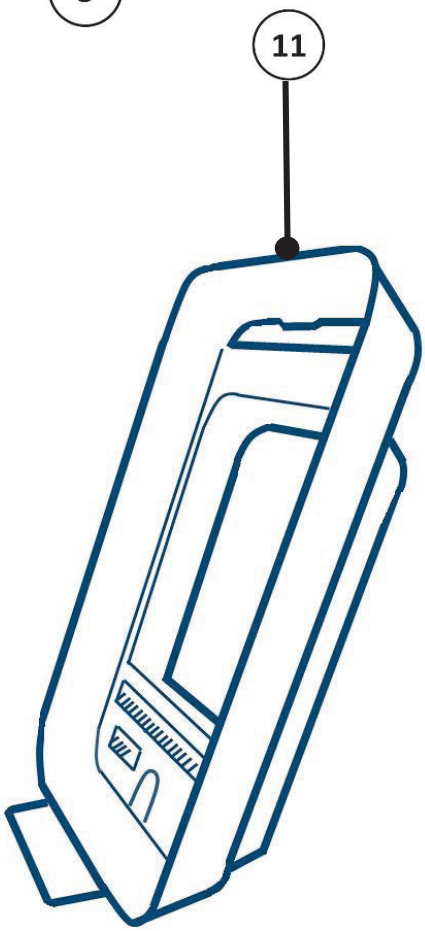
It is possible to connect TELO to different networks:

- Connect TELO to **Bluetooth®** will enable to use a Bluetooth® Headset or Speaker during a call, a wheelchair via Bluetooth®, or to use TELO with a Bluetooth® mouse.
- Connect TELO to **WiFi** will enable to get on the Internet with the integrated browser.
- Connect TELO to **Z-wave radio** controlled equipment (TELO with Z-wave version).
- Connect TELO to **GSM** will enable to make or got a call or type or receive a SMS.

Activation of **text to speech** enables TELO to create an artificial speech from a typed word or group of words. This activation allows people suffering from expression aphasia/disorders to orally communicate with those around them.
Activation of **voice recognition** allows TELO to analyze a speech captured by its internal microphone and to transcribe it in the form of text.

TELO composition





1	Speaker
2	RESET button
3	Micro SD port
4	Microphone
5	Battery power port & PC port
6	External micro port
7	USB port
8	Relay and wheelchair switch port
9	Switch 1 port
10	Switch 2 port
11	Docking station of TELO

Accessories of TELO

Référence	Désignation	
ZZAF	Voice Recognition option (valid for the two versions of TELO)	
7T602	Support "smart" included in two versions Telo. TELO Docking.	
7T603	Adjustable arm for TELO	
7T604	Wireless transmitter for TELO switch	
7T605	PC TELO receiver	
7T606	TELO Location's device	
7T607	Set of 2 guides fingers TELO (9 and 20 boxes)	
7T608	TELO protection	
7 E22	Grid Mobile software	
ZZAAA	TELO external microphone
